	Insert	Append	-- Scale --
extraLarge	715.77ms	3.054ms	Append(.push) is a much better scale because it is linear, Insert(.unshift) is worse because its quadratic
large	8.998ms	670.4µs	Extra Credit: quadtric is so much slower becuase its growth is proportional to the other parameter. n^2
medium	136.7µs	117.4µs	
small	34µs	74.2µs	
tiny	23.5µs	66.4µs
